LOCAL TAMPA FLORIDA COMPANY WINS INTERNATIONAL ENVIRONMENT AWARD

Premier All Natural Filters, of Lutz, Florida has been just notified that it is among the major winners in the International Green Apple Environment Awards, given by The Green Organisation in London England.

Premier All Natural Filters won the Green Apple Award for Environmental Best Practices in North America for their unique monthly filter service to restaurants, hotels, hospitals, schools and nursing homes, to assist in the control of humidity, ethylene, mold and bacteria. Premier manufactures their own filters with a totally biodegradable and edible proprietary compound that is environmentally friendly and contributes to the reduction of carbon in the ozone by reducing electricity and eliminating food waste.

The Green Apple Awards began in 1994 and attracted more than 500 nominations this year. The Green Organisation is an independent, non-political, non-activist, non-profit environment group dedicated to recognizing, rewarding, and promoting environmental best practices around the world. The Green Organisation is funded by membership and sponsorship, with valuable support from the Environment Agency, the Chartered Institute of Environmental Health, the Chartered Institution of Wastes Management, the Municipal Journal and several other professional bodies, all located within the United Kingdom. The Green Organisation's logo is stylised by combining the G and O initials to form the shape of a green apple.

The Green Apple campaign is now in its fifteenth year - recognising, rewarding and promoting environmental endeavours and initiatives at all levels, and around the world. The Green Apple Awards ceremony will be conducted at the Houses of Parliament in London, on November 15, 2010.
